### PROFILE

A goal-driven data analyst skilled in the use of business intelligence tools for process validation and business needs analysis, making use of proven research methods to provide insight, hence translate data-driven business decisions into executable project plans and strategies to position the business for growth.

### EMPLOYMENT HISTORY

#### Data Analyst Intern at 10alytics, Lagos

August 2022 — September 2022

I mastered the skill to sift through data, separating valuable insights from noise and presenting results in a clear, succinct, and explicit manner, in order to both inspire and facilitate data-driven business decision making. I used skills like data collection, data cleaning/wrangling, data analysis, data visualization, and business intelligence to successfully execute the following projects:

- Covid-19 Analysis with PowerBI
- Relief Donation Database Analysis with PostgreSQL

#### Data Analyst Support at Huawei Technologies Co. Nigeria, Lagos

October 2018 — Present

- Successfully carried out data analysis and uncovered insights to help harness the over 10,000 sites data being monitored daily.
- Successfully used PowerBI and Excel skills to review, analyze, develop KPI structure, appraise sites performance and create a visual report presentation of sites down in real-time per technology (2G, 3G, 4G), hence reducing MTTR (minimum time to restore) to less than 5 minutes and improving RNA (radio network availability) to over 96% on a mobile network.
- Created a data model to generate reports comparing business process evolution assisting C-level staff with appropriate KPIs to encourage improved operations processes.

### EDUCATION

#### Google Data Analytics at Google

May 2022 — August 2022
